

It is a true privilege to be nominated for this award.

In short:

- I believe I touch lives through game of golf everywhere I go
- When I do something, I do it with a sense of golf i.e. think about it, see it and execute with confidence
- When I start a task I try and relate it towards golf i.e. what is the score objective, what are the conditions / opportunities and what hazards to avoid
- When I talk to people, I make golf sound fun and easy to get them to play more often

When you put all these things together, you get a formula that helps all golfers enjoy their outing. When you are out on the course, at a braai or at a function, the one thing someone can always talk about is their golf. From their clubs, to the 18th tee shot. It is the 1 sport where you talk about skills, luck and penalties in the same sentence. As long as we all pitch in together, we can make a difference to all golfers nationwide. Growing golf is a passion that cannot be avoided.

Because golf is fun and we all know someone that fits into this category, see the pics below. The more fun we make golf the more people will play it.
